## Web & Mobile App Developer

Programming is something I really love and because of which I decided to be a software engineer. As software engineering is a very vast field, so I decided to be a mobile and web app developer. I uses MERN stack (Mongo DB, Express JS, React JS and Node JS) for web app and backend development, and React Native for mobile app development.

## Strengths & Skills

- ✓ HTML
- ✓ CSS
- ✓ JavaScript
- ✓ Bootstrap
- ✓ React JS
- ✓ Node JS
- ✓ Express JS
- ✓ Material UI
- ✓ React Native
- ✓ Firebase
- ✓ Netlify
- ✓ Heroku

## Academics

Title	Institute	Date
BS in Software Engineering	COMSATS University Islamabad	2018-2022
Pre-Engineering	Govt PG Jahanzeb College, Swat	2017
Basic Schooling	Excelsior College, Swat	2015

## Experience

### Projects

#### Budget and stock management tool (shinesbudget.com)

Tools: React JS.

Shines budget is an advance budget and stock management tool. It provides you stock screening, different values, dividend calculation, budget management to manage your income and expenses and it shows a chart of your expenses and the percentage of items you are spending your money on. GDS, TDS calculator, it shows a chart to show you that are eligible for loan or not. You can setup your portfolio and some other functionalities.

#### Virtual Bazaar

Tools: React JS, Mongo DB, Express JS, and Node JS

Virtual bazaar is an e-commerce platform empowered by augmented reality. The platform has virtual mirror, order from nearby shops and have google maps integration for setting delivery location. Basically, this project has 4 apps two mobile apps and two web apps. This project has mobile app for buyers to search items, try glasses using virtual mirror, order fast food, order from nearby shops and some other features like traditional ecommerce platforms. Then there is one mobile app for delivery boys to receive orders from sellers and to view delivery location. One web app is for seller to manage their business and one app is for admin to manage the platform.
